MODEL 546B COMPUTER

The Model 546B BENNETT Computing Pump is constructed particularly for service stations requiring a gasoline pump with an unusually "long-reach." From panel to nozzle-tip the Model 546B has a reach of 12' 2". As the illustration shows, the hose does not touch the island when the nozzle is on the nozzle hook. Aside from the mechanical changes made to accommodate an eleven foot hose, Models 546 and 541 are identical. In this model two advertising panels, one in each door, are supplied. Model 546 has no advertising panels. Other units equipped with long-reach hose are Models T546 Twin Computer, Model 547 Non-computer and Model T547 Twin Non-computer. Globe adapter, if requested at the time of order, will be supplied. No provision, however is made for using an island lighter.
